**Why Belize!
Why Now!**

Paradise is not only making market conditions work in your favor!

- **Belize pegs its currency 2:1 to the US\$**
Canadians and U.K. investors should take advantage of their current strong currency
- **Belize enjoys great currency exchange rate stability**
- **Belize, despite its natural beauty and friendly people, has remained inexpensive**
- **Belize has experienced an increase in tourism of over 55%**

As more people learn about this beautiful, English speaking paradise, property values in Belize will increase. It makes sense to invest in a planned community where someone else has done the research and learned to navigate the purchasing process.

Go online or call to book your tour.
